

STYRO-TECH

Polystyrene & Foam Products

Environmental Policy - Polystyrene Packaging

Styro-tech is committed to protecting the environment by using Polystyrene Block (raw material) that is produced using bead that contained only a pentane blowing agent. Pentane does not contain chlorofluorocarbons (cfc) it is found and formed in nature & has no effect on the earth's ozone layer. It is quickly broken down into carbon dioxide and water.

Styro-Tech will cooperate with all responsible bodies in seeking ways to minimise the detrimental effects of our production, distribution and material recovery on the environment.

Styro-tech will ensure that the environmental effects of any capital investment are fully evaluated and incorporated as part of any investment decision.
